SUMMARY

Enthusiastic Junior DevOps Engineer here, ready to dive into this field and work my way towards becoming a NetDevOps Engineer. I'm skilled with :

- DevOps tools and willing to automate SDLC processes using GIT, Ansible, Jenkins, Docker, and testing tools.
- In my past role at a startup, I excelled at boosting clients with Wi-Fi and geolocation solutions.
- Strong communication, troubleshooting, and quick learning are all part of my soft skills set.

Hard skills

OS

Linux (Debian,CentOS), Windows

Management & VCS & Databases

Ms Project, Trello, Git, MySQL

Virtualization/Cloud

VMware, KVM, Docker,AWS

Scripting et Automation

Bash, Python, JAVA, Rest APIs, Ansible, Vagrant, Jenkins,Cucumber,karate, Terraform

Protocols

SSH, DNS, DHCP, FTP, NAT, DDNS

Soft skills

Problem solving, Time management, Empathy, Teamwork, Adaptability

Languages

Arabe - Native

French - C

English– B2 –Toeic 850

Interests

Sketching, Guitar, Nature, Taekwondo

EXPERIENCE

MAY 2023 - ONGOING - Training- ALX - Casablanca, Maroc

Soft skills + AWS Cloud Practitioner & Solutions Architect Associate

JAN 2018 - FEB 2021 - Telecom Engineer - Wiibus, Sablons, France

Main Role: Deploying 4G routers on buses to provide passengers an onboard WiFi along with buses geolocation.Those are some accomplished missions:

- Assure routers onboarding with the right configuration, such as : Login page customization, User's authentication & sessions, Data usage , FTP logging and firewall settings.
